Project Transportation

End-to-end logistics for medium to large-scale industrial and infrastructure projects across India, Nepal, Bhutan, and Bangladesh — where precision, planning, and timely execution are non-negotiable.

What Is Project Cargo?

Project transportation involves the movement of bulk materials, heavy machinery, and Over Dimensional Cargo (ODC) for industrial and infrastructure projects.

These projects are highly time-sensitive — even a one-day delay can lead to losses running into several lakh rupees.

At IFM, we specialize in seamless project cargo transportation, ensuring precise planning and coordination at every stage.

Scope of Project Cargo

Bulk Material

Large-volume transportation using trucks and tempos for project materials.

FTL Logistics

Full Truck Load services for standard industrial goods across India.

Trailers

Various sizes and capacities for machinery, structures, and equipment.

ODC Transport

Over Dimensional Cargo movement across India with specialized handling.

Super ODC & Heavy Lift

Specialized Capabilities

For the most complex movements, IFM deploys:

- Hydraulic axle systems for super-heavy loads
- Specialized multi-axle trailers
- Certified heavy lift operators
- Comprehensive cargo securing and weight distribution solutions

This integrated capability makes IFM a single-point logistics partner across India, eliminating delays caused by multiple vendors.

40+ Years of Operational Expertise

40+

Years of Experience

Deep operational expertise in Transport and Project Logistics across India.

4

Countries Served

India, Nepal, Bhutan, and Bangladesh.

1

Single-Point Partner

Integrated logistics eliminating multi-vendor delays.

Proactive Planning & Foresight

IFM proactively anticipates challenges — whether related to routes, permissions, or infrastructure — and plans movements to ensure uninterrupted execution.

Route Planning

Pre-assessed corridors for ODC and heavy lift movements.

Permit Management

Regulatory clearances secured in advance.

Infrastructure Assessment

Bridge, road, and clearance evaluations before transit.

Why Choose IFM?

Strategic Project Logistics

End-to-end transportation of project materials across India with advanced planning and expert ground execution for every complex industrial logistics requirement nationwide.

Expert Ground Execution

Skilled wiremen for transport manage electrical clearances, while dedicated rigging crew logistics ensure safe handling. Professional loading and lashing services maintain cargo integrity during long-distance transit.

Heavy Lift Operations

Certified heavy lift operators and expert hydraulic axle operators for massive industrial components. Comprehensive cargo securing solutions stabilize weight distributions, ensuring your high-value assets arrive safely.

Pan-India Project Footprint

IFM has successfully executed project transportation assignments across Mumbai, Maharashtra, Gujarat, Odisha, Bengal, Uttar Pradesh and Pan-India locations for leading companies, delivering to the highest standards of client satisfaction.

- Mumbai & Maharashtra
- Gujarat
- Odisha & Bengal
- Uttar Pradesh & Pan-India

Trusted by Industry Leaders

IFM has delivered project transportation for some of India's most prominent industrial companies, consistently meeting the highest standards of client satisfaction.

- JSW Steel Limited
- AMNS
  ArcelorMittal Nippon Steel
- Tata Steel
- Jindal Steel
- Jagatjit Industries
- Gallant Ispat

Ready to Move Your Project Cargo?

From bulk materials to super ODC, IFM is your single-point logistics partner across India, Nepal, Bhutan, and Bangladesh. Let us handle the complexity so you can focus on your project.
